First Gesture:

- emergence
- transition
- disappearance
- oscillation
- voluntary
- tight
- dominant
- coexistence
- center

Change structProc [1, 2]

- emergence
- statement
- arrival

- spiral
- voluntary
- tight
- dominant
- conflict
- canopy

Change structProc [2, 2]

- emergence
- transition
- disappearance
- ascent
- pressured
- loose
- subordinate
- conflict
- root

DEFINITIONS

ONSETS

departure: the action of leaving, especially to start a journey

emergence: the process of coming into view or becoming exposed after being concealed

anacrusis: ‘delta’ but also one or more unstressed notes before the first bar line of a piece or passage

attack: an aggressive and violent action against a person or place

upbeat: an unaccented beat preceding an accented beat

downbeat: an accented beat, usually the first of the bar

CONTINUATIONS

passage: the act or process of moving through, under, over, or past something on the way from one place to another

ransition: the process or a period of changing from one state or condition to another

prolongation: extension of the spatial length of something

maintenance: process of maintaining or preserving someone or something

statement: the occurrence of a musical idea or motive within a composition

TERMINATION

arrival: the emergence or appearance of a new development, phenomenon, or product

disappearance: the process or fact of something ceasing to exist or be in use

closure: a sense of resolution or conclusion at the end of an artistic work

release: allow or enable to escape from confinement; set free

resolution: the passing of a discord into a concord during the course of changing harmony

plane: a level of existence, thought, or development

MOTION AND GROWTH

UNI ascent: a climb or walk to the summit of a mountain or hill

plane: a level of existence, thought, or development

descent: an action of moving downward, dropping, or falling

RECIPROCAL parabola:

oscillation: movement back and forth at a regular speed

undulation: the action of moving smoothly up and down

CYCLIC rotation: the action of rotating around an axis or center

spiral: winding in a continuous and gradually widening (or tightening) curve

spin: rapid turning or whirling motion

CENTRIC vortex: a mass of whirling fluid or air, especially a whirlpool or whirlwind

pericentrality: arranged around a center

centrifugal motion: apparent outward force on a mass when it is rotated

BI/MULTIDIRECTIONAL agglomeration: a mass or collection of things

dissipation: to spread thin or scatter and gradually vanish

dilation: the act or action of enlarging, expanding, or widening

contraction: to draw together so as to become diminished in size

divergence: a drawing apart (as of lines extending from a common center)

convergence: independent development of similar traits or features (as of body structure or behavior) in unrelated or distantly related species or lineages

exogeny: the origins of existence of self, or the identity of self, emanating from, or sustaining, outside the natural or influenced realm

endogeny: processes that originate from within a living system such as an organism, tissue, or cell

SPECTRAL SPACE

canopy: above 5,000Hz

center: 300Hz and 5,000Hz

root: below 300Hz
